604 W. 14 Street, Austin, Texas 78701

texaspipelines.com

The Texas pipeline industry is proud of our relationships with landowners. We are going to be neighbors for a long time and want to treat them with the utmost respect and courtesy. They deserve it.

While building and operating the necessary infrastructure for the transportation of natural gas and liquid hydrocarbon products that provide for our critical energy needs, TPA member companies and their representatives commit to safe operations, environmental stewardship, and respect for landowners and communities in which they operate.

“ The people I talked to were forthright - they told me what they needed, and I told them what I needed. They were great - I have never found any easier negotiation. I also appreciate the industry's willingness to answer all my questions and to take into consideration any concerns I might have had regarding the pipeline recently constructed on my property. And on top of that, the four pipelines I've had on my land for 70 years have caused absolutely no damage to the property or injury to anyone. ”

— MARSHALL TREADWELL
Landowner, Rusk County, Texas

“ I liked how honest and straightforward the workers handled their business. From the project manager to the equipment operators, everyone was respectful of my property. Thanks to all who worked on the project for leaving my farm better than they found it. ”

— JUSTIN MCDONNELL
Landowner, Grayson County, Texas

“ The men working on the gas line currently being constructed on my property are very respectful and nice to work with. ”

— RON CONNOT
Landowner, Lamar County, Texas

Environmental Protection

Protection of the environment is a top priority for the pipeline industry. We strive to accomplish this by adhering to industry best practices while continuing to invest in state-of-the-art equipment designed to safeguard the environment and protect landowners and communities from property damage.

Safety – 811

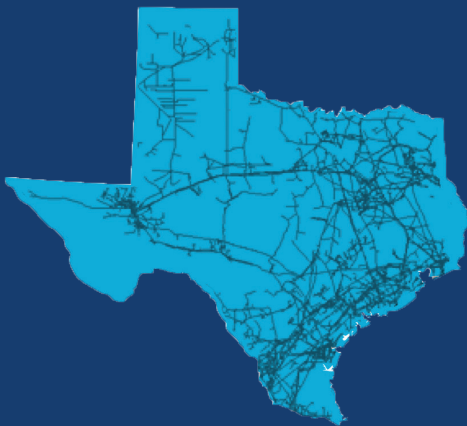

In partnership with state and federal governments, pipeline companies continuously work to enhance pipeline safety awareness through programs such as "811: Call Before Dig."

Eminent Domain

Pipeline companies always prefer to obtain property rights-of-way through fair, market driven negotiations with landowners. Negotiations between landowners and pipeline companies are overwhelmingly successful, a fact the public does not often hear.

**TEXAS PIPELINE
ASSOCIATION**

Texas Pipeline Association, the largest state trade association in the country representing solely the interests of the intrastate pipeline network, is the primary resource for information regarding the Texas pipeline industry and provides advocacy on issues related to pipeline safety, environmental regulations, taxation and legislation. Member companies and their representatives commit to conduct their business in accordance with integrity, honest communication, fair right-of-way acquisition, respectful construction, and safe operations.
